Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

1. Claims 1-16 have been examined.

#### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Le Berre EP 0 940 960 A1.

4. As per claims 1, 8-10 and 14-16 Le Berre teaches a method for secure mutual authentication comprising the steps of:

authenticating a customer at a first web site [column 7, lines 13-22];

receiving a selection from said customer at said first web site requiring transfer to a second web site [column 7, lines 22-29];

generating an authentication message for said customer at said first web site, said authentication message devoid of intelligent information of said customer [column 7, lines 31-42 and figure 5]; and

transferring said authentication message from said first web site to said second web site for authentication of said customer by said second web site [column 7, lines 37-57 and column 9, lines 11-19].

Art Unit: 2135

5. As per claim 2, Le Berre further teaches the step of generating an authentication message comprises incorporating a customer pseudonym into said authentication message, said customer pseudonym uniquely identifying said customer and devoid of intelligent information of said customer [column 6, lines 34-49].
6. As per claim 3, Le Berre further teaches the step of generating an authentication message further comprises randomly generating said customer pseudonym [column 10, lines 44-54].
7. As per claim 4, Le Berre further teaches the step of generating an authentication message further comprises incorporating a date/time stamp, a partner name and an optional uniform resource locator (URL) with a return address for said first web site into said authentication message [column 6, lines 41-55].
8. As per claims 5-6, Le Berre further teaches the step of generating an authentication message comprises incorporating a source identifier, a date/time stamp, an optional return URL, a customer pseudonym, a cryptographic key, a transaction identification and authenticated data for the first web site into said authentication message [column 6, lines 41-55 and figure 5].
9. As per claim 7, Le Berre further teaches the step of authenticating said customer at said second web site using said authentication message generated by said first web site [column 9, lines 1-19].

Art Unit: 2135

10. As per claim 11, Le Berre further teaches the step of authenticating said customer at said second web site occurs when said customer has previously visited said second web site, and further comprising the step of prompting said customer to log in to said second web site when said customer has not previously visited said second web site [column 9, lines 1-19].

11. As per claim 12, Le Berre further teaches said authentication message comprises a uniform resource locator (URL) with a return address for said first web site, and further comprising the step of returning said customer from said second web site to said first web site using said URL without further authentication by said first web site [column 6, line 51].

12. As per claim 13, Le Berre further teaches the step of generating said authentication message for said customer at said first web site [column 9, paragraph 0033].
